SOFT SKILLS

Analytical Thinking,
Teamwork, Communication,
Responsibility, Attention to
Detail, Fast Learning, Problem
Solving, Time Management

TECHNICAL SKILLS

Data Analytics

- Business Analysis
- Data Mining
- Data Preprocessing

Power BI: Dashboard Design,
Slicers, Filters, Sales Dashboard,
Daily Report, Summary Report,
Data Visualization

MS SQL Server: SELECT,
WHERE, JOIN, GROUP BY,
ORDER BY, Data Querying

Excel: Pivot Table, VLOOKUP,
XLOOKUP, IF, SUMIFS, Charts,
COUNTIFS, Data Validation

Programming & Tools

Python, Pandas, GitHub, VS Code

LANGUAGES

- Thai (Native)
- English (Intermediate)
- Japanese (Basic)

PROFILE

Fifth-year double-degree student in Information Technology and English, passionate about data analytics and business insights. Experienced in working with SQL, Excel, Power BI, and Python to analyze data, create dashboards, and present findings. Eager to turn business data into actionable insights that support better decision making.

EDUCATION

Information Technology 2022 - present
Bachelor of Science | University of Phayao
GPA: 3.73 / 4.00
English 2022 - present
Bachelor of Arts | University of Phayao
GPA: 3.84 / 4.00

PROJECTS

English Syntactic Analysis Tool

Senior Project | Jul. 2025 - Jul. 2026

- Developed a full-stack web application for English syntactic analysis using a fine-tuned T5 model.
- Collected and prepared a custom dataset for generating S-expression outputs from English sentences.
- Fine-tuned and manually tested the model against a prepared test set, with expert review for validation.
- Built a FastAPI backend and React frontend to display syntax tree visualization.

Tools: Python, T5, Hugging Face Transformers, FastAPI, React, Node.js, Tailwind CSS, Git & GitHub, VS Code, Google Colab

Retail Sales Performance Analysis

Business Analytics Project | Jul. 2026

- Analyzed a Kaggle retail sales dataset using Excel, SQL, and Power BI to understand sales trends and business performance.
- Cleaned and explored data in Excel by checking missing values, reviewing data quality, and creating Pivot Tables.
- Used SQL queries with GROUP BY, SUM, AVG, and ORDER BY to summarize sales by month, category, and customer segment.
- Built a Power BI dashboard with KPI Cards, Line Charts, Bar Charts, and Slicers, and summarized key business insights.

Tools: Excel, SQL, Power BI
